

FP501 FIRE RATED GRAPHITE SEALANT

UP TO 4 HOURS FIRE RESISTANCE

SEALING COMBUSTIBLE PIPES
& PIPE INSULATIONS
UL-EU-01242-CPR

FP 501 is a high specification formulation designed to prevent the spread of fire, smoke and gases through openings in fire rated walls and floors. It is designed to fire seal difficult services which traditional fire rated mastics do not achieve such as large plastic pipes. See technical data sheet and installation guide for specific information regarding how to install fire seals, different fire ratings and approvals. Store between 5°-30°C. Use within 12 months of manufactured date.

Warning:
Store away from children. Avoid contact with skin and eyes.
Do not swallow. To be kept frost free.
